PROFESSIONAL SUMMARY

Software Engineer at Tech Mahindra with **2.8+ years** of experience in telecom OSS/BSS automation and **Generative AI engineering**. Specializing in Order Journeys, Billing, and Lead-to-Cash automation for BT Openreach (UK) — a Tier-1 CSP. Conceived and delivered a **GenAI-powered automation platform** (similar to n8n) integrating Claude and Amazon Q to orchestrate complex telecom workflows — widely adopted across IBU. Building **production-ready RAG systems** with LangGraph, multi-agent orchestration with AGNO & Google ADK, and LLMs from scratch. Recipient of the **BRAVO Award** for innovation, execution excellence, and leadership.

CORE SKILLS

AI Agents & RAG	LangGraph, LangChain, AGNO, Google ADK, Amazon Bedrock, Multi-Agent Orchestration	**LLM & GenAI**	Claude API, Amazon Q, OpenAI, Prompt Engineering, LLM from Scratch, FlashRank
Vector & Search	Qdrant, Word Embeddings, Dense + BM25 Hybrid Retrieval, RAG Pipelines	**Telecom BSS/OSS**	Netcracker RBM, Order Journeys, Billing, Mediation, Lead-to-Cash, Revenue Assurance
Backend & APIs	Python, Spring Boot, FastAPI, Flask, Shell/Bash, Oracle SQL, PL/SQL, REST APIs	**Frontend & Tools**	React (Vite), Streamlit, Gradio, Ollama, Docker, n8n, Git, Linux/Unix

PROFESSIONAL EXPERIENCE

Automation Developer Lead — Telecom Order Journeys (OSS/BSS) 🏆 BRAVO AWARD

Sep 2023 – Present

Tech Mahindra Ltd. — Client: BT Openreach (UK)

Telecom OSS/BSS · GenAI Platform · Billing Automation

- **Conceived, architected & delivered a GenAI-powered automation platform** (n8n-like) integrating Claude & Amazon Q for LLM-driven telecom workflow orchestration — adopted across IBU
- Advanced prompt engineering & contextual automation with intelligent validation layers and reusable AI workflow templates
- Led large-scale automation across Order Journeys, Billing, and Lead-to-Cash workflows for Tier-1 CSP
- Integrated Netcracker RBM core BSS APIs for account creation, order validation, and billing readiness
- Engineered Python-based GBSF parser transforming complex fixed-width telecom data into structured datasets
- PL/SQL-driven analysis for order fallouts, billing discrepancies, and revenue-impacting issues
- Standardized automation assets improving OSS/BSS ecosystem maturity and operational efficiency
- **Awarded BRAVO Award** for innovation, execution excellence, and measurable business impact

Database & Web Application Development Intern

Internship

Kaizen Engineers

- Developed database-driven web applications using PHP, MySQL, HTML/CSS, and JavaScript
- Designed ER diagrams and implemented backend logic for internal business applications

AI & OPEN SOURCE PROJECTS

- **Production RAG Agent** — Built a fully local, production-ready RAG system with hybrid BM25 + Dense Vector search, FlashRank reranking, LangGraph orchestration, Qdrant vector DB, and Ollama. No API keys needed.
- **Multi-Agent Research System** — Orchestrated multi-agent pipelines using AGNO framework with Google ADK & Amazon Bedrock for parallel research and synthesis.
- **LLM from Scratch** — Implemented word embeddings, tokenization, and transformer attention mechanisms from ground up using Python and NumPy.
- **GenAI Automation Platform** — n8n-like workflow orchestrator with Claude & Amazon Q integration for enterprise telecom automation (BRAVO Award winner).
- **GBSF Parser Framework** — Python engine transforming complex fixed-width telecom data into structured datasets for BT Openreach.

EDUCATION

Bachelor of Engineering — Computer Engineering

CGPA: 9.12

Sinhgad Institute of Technology, Lonavala

ADDITIONAL

Experience: 3+ Years

Award: BRAVO Award — Tech Mahindra

Leadership: Chairperson — SIT ACM Chapter

Certifications: MongoDB (MongoDB Univ.), COVID-19 (WHO)

Languages: English, Marathi, Hindi

Editorship: Editor-in-Chief — Dept. Magazine (3 yrs)
